

Medical confirmation for *scalp micropigmentation*

FOR THE PATIENT

Please give this to your oncologist, specialist nurse, GP or dermatologist. They can fill it in, or write their own note covering the same points. Some GP surgeries charge for letters like this, so your hospital team may be the easiest to ask.

Your patient has asked Blackline Clinic for scalp micropigmentation (SMP), a cosmetic tattoo that places pigment in the upper dermis of the scalp, using sterile single-use needles, to create the look of hair follicles. Treatment usually takes two or three sessions of 2 to 4 hours, 1 to 2 weeks apart. Before treatment, we ask a member of the patient's medical team to confirm the points below. This form is only used for the patient's care and to apply our reduced rate for people with medical hair loss.

PATIENT NAME

DATE OF BIRTH

1. CAUSE OF HAIR LOSS

- ☐ Chemotherapy ☐ Radiotherapy ☐ Surgery ☐ Hormone or other ongoing treatment ☐ Alopecia
☐ Other medical condition

DETAILS Optional

2. TREATMENT DATES

DATE OF LAST CHEMOTHERAPY OR RADIOTHERAPY, IF APPLICABLE

3. FITNESS FOR SMP

- ☐ The patient is well enough to have SMP ☐ Yes, with the precautions below ☐ Not at the moment

PRECAUTIONS, OR ANYTHING WE SHOULD KNOW For example bleeding risk, immune suppression, or skin that has had radiotherapy

CLINICIAN
